

ARM818X

CRACK REPAIR EPOXY PUTTY

PRODUCT DESCRIPTION

ARM818X is a two component 100% solids epoxy crack filler designed for shallow repair on either vertical or horizontal surfaces. This product is easy to mix and use and has a non-critical mix ratio. Additionally, the product, because it is a 100% solids formulation, can be applied thicker on horizontal surfaces when required.

RECOMMENDED FOR: Recommended for repairing cracks and defects in concrete or masonry

SPECS

SOLIDS BY WEIGHT/VOLUME	100%
GARDNER VARIABLE IMPACTOR	50 inch pounds direct – passed
VOLATILE ORGANIC CONTENT	Less than 11 g/l
RECOMMENDED THICKNESS	1/8" cracks or thin build repairs
SHELF LIFE	6 months in unopened containers
MIX RATIO	1 Pat A to 1 Part B
ABRAISON RESISTANCE	Taber abraser CS-17 calibrase wheel with 1000 gram total load and 500 cycles = 36 mg loss
FLEXURAL STRENGTH	7,500 psi @ ASTM D790
COMPRESSIVE STRENGTH	8,710 psi @ ASTM D695
ADHESION	350 psi @ elcometer (concrete failure, no delamination)
VISCOSITY	Mixed => 3,100,000 cps (typical)
DOT CLASSIFICATIONS	Part A "not regulated" Part B "not regulated"
TENSILE STRENGTH	6,256 psi @ ASTM D638
ULTIMATE ELONGATION	2.4%
HARDNESS	Shore D = 65
HEAT DEFLECTION TEMP	59 degrees C (138 degrees F)
PACKAGING INFORMATION	2 gallon kit= 1 gallon part A @ 11.1 pounds and 1 gallon part B @ 11.2 pounds (22.3 pounds net). 10 gallon kits (111.5 pounds net)

COVERAGE

Per Gallon	0.13 cubic feet or 1,228 lineal feet @ 1/8" x 1/8"
------------	--

COLORS

Medium gray

CURE SCHEDULE

POT LIFE (2 Gallon Volume)	1-3 hours
TACK FREE (Dry to touch)	5-10 hours
RECOAT/TOPCOAT	immediately after application
LIGHT FOOT TRAFFIC	10-24 hours
FULL CURE (heavy traffic)	2-7 days
APPLICATION TEMPERATURE	60-90 degrees F

PRIMERS

None required

TOPCOAT

None required. Many of ArmorPoxy's epoxies and urethanes are compatible.

CHEMICAL RESISTANCE

Butanol	C
Xylene	B
1,1,1 trichloroethane	A
MEK	A
Methanol	A
Ethyl Alcohol	A
Skydrol	B
10% Sodium Hydroxide	E
50% Sodium Hydroxide	D
10% Sulfuric Acid	C
70% Sulfuric Acid	A
10% HC1 (aq)	C
5% acetic acid	A

Rating Key: Rating key: A - not recommended, B - 2 hour term splash spill, C - 8 hour term splash spill, D - 72 hour immersion, E - long term immersion. NOTE: extensive chemical resistance information is available through your sales representative.

FEATURES

Can Be Used with Other ArmorPoxy Coatings

Impact Resistant

Applies Like Spackle

Recoat/Topcoat Immediately

Easy Mix Ratio

LIMITATIONS

Color stability may be affected by environmental conditions such as high humidity, chemical exposure, or exposure to certain types of lighting such as sodium vapor lights. Colors may vary from batch to batch. This product is not UV color stable and may discolor when exposed to UV light sources. Substrate temperature must be 5°F above dew point. All new concrete must be cured for at least 30 days prior to application. Many epoxy products can be placed directly over the uncured epoxy crack filler immediately after the material is used provided that the cracks are small. If coating over repairs that are larger, it may be advisable to allow the material to become tack free prior to application of subsequent coatings. See reverse side for application instructions. Physical properties are typical values and not specifications. See reverse side for limitations of our liability and warranty.

ARM818X

CRACK REPAIR EPOXY PUTTY

PRODUCT STORAGE

Store product at normal room temperature before using. Continuous storage should be between 60 and 90 degree F. Low temperatures or temperature fluctuations may cause product crystallization.

SURFACE PREPARATION

All dirt, foreign contaminants, oil and laitance must be removed to assure a trouble free bond to the substrate. A test should be made to determine that the concrete is dry; this can be done by placing a 4'X4' plastic sheet and taping down the edges. If after 24 hours, the substrate is still dry below the plastic sheet then the substrate is dry enough to start repair work. This product is intended for hairline cracks and other fractures up to an 1/8 inch in width. Remove all unsound concrete from within the crack to be repaired and thoroughly vacuum all debris and dust from within the crack opening.

PRODUCT MIXING

This product has a mix ratio of 1 part A to 1 part B by volume. To mix, simply measure out equal volumes of the material and mix them together thoroughly with slow speed mixing equipment such as a jiffy mixer, putty knife or spatula until the material is thoroughly mixed and uniform in color. Mix only an amount of material that can be used in the allotted pot life period. Improper or insufficient mixing may result in product failure. PRIMING: No priming is necessary.

PRODUCT APPLICATION

The mixed material can be applied by marginal trowel, putty knife or any other suitable equipment.

RECOAT OR TOPCOATING

When repairing cracks that are less than 1/8" thickness, many epoxies can be placed directly over the applied crack filler before it is cured. Alternatively, it is also acceptable to allow the material to cure before installing the coating. If excessive amounts are spread well beyond the crack repair or in an areas where surface repairs have been implemented, it is best to check the cured areas for any possible amine blush (a whitish, greasy film or deglossing) prior to coating over this material. If a blush is present, it can be removed by any standard type detergent cleaner prior to topcoating or recoating. Many epoxy coatings and urethanes are compatible for use over this product as well as multiple coats of this product.

CLEANUP

Use xylol.

FLOOR CLEANING

Caution! Some cleaners may affect the color of the fast gel installed. Test each cleaner in a small area, utilizing your cleaning technique. If no ill effects are noted, you can continue to clean with the product and process tested.

RESTRICTIONS

Restrict the use of the floor to light traffic and non-harsh chemicals until the coating is fully cured (see technical data under full cure). It is best to let the floor remain dry for the full cure cycle. Dependent on actual complete system application, surface may be slippery, especially when wet or contaminated; keep surface clean and dry.

NOTICE TO BUYER: DISCLAIMER OF WARRANTIES AND LIMITATIONS ON OUR LIABILITY

We warrant that our products are manufactured to strict quality assurance specifications and that the information supplied by us is accurate to the best of our knowledge. Such information supplied about our products is not a representation or a warranty. It is supplied on the condition that you shall make your own tests to determine the suitability of our product for your particular purpose. Any use or application other than recommended herein is the sole responsibility of the user. Listed physical properties are typical and should not be construed as specifications. NO WARRANTY IS MADE, EXPRESSED OR IMPLIED, REGARDING SUCH OTHER INFORMATION, THE DATA ON WHICH IT IS BASED, OR THE RESULTS YOU WILL OBTAIN FROM ITS USE. NO WARRANTY IS MADE, EXPRESSED OR IMPLIED, THAT OUR PRODUCT SHALL BE MERCHANTABLE OR THAT OUR PRODUCT SHALL BE FIT FOR ANY PARTICULAR PURPOSE. NO WARRANTY IS MADE THAT THE USE OF SUCH INFORMATION OR OUR PRODUCT WILL NOT INFRINGE UPON ANY PATENT. We shall have no liability for incidental or consequential damages, direct or indirect. Our liability is limited to the net selling price of our product or the replacement of our product, at our option. Acceptance of delivery of our product means that you have accepted the terms of this warranty whether or not purchase orders or other documents state terms that vary from this warranty. No representative is authorized to make any representation or warranty or assume any other liability on our behalf with any sale of our products. Our products contain chemicals that may CAUSE SERIOUS PHYSICAL INJURY. BEFORE USING, READ THE MATERIAL SAFETY DATA SHEET AND FOLLOW ALL PRECAUTIONS TO PREVENT BODILY HARM.
