

Resin Color Management Fuzion Mica Spray Technical Data Sheet

1. Description

Resin Color Management Fuzion Mica Spray is an aerosolized mica infused metallic spray coating system. It is designed for decorative concrete products such as epoxy coatings, polyaspartic coatings, cementitious overlay products and solvent-based sealers. It has a robust application window in accordance with the product it is being applied to in a wet application.

2. Primary Applications

- 1) Epoxy Coatings
- 2) Polyaspartic Coatings
- 3) Cementitious Overlay Coatings
- 4) Solvent-Based Sealers

3. Advantages

- 1) Eliminates need to mix mica powder(s) into product
- 2) Eliminates wasted product as a result of over-mixing
- 3) Eliminates need for buckets/cups required for mixing
- 4) V.O.C. compliant in all 50 states and Canada

4. Packaging

Packaged in 8 ounce, 12 ounce, 14 ounce aerosol can (colors upon request)

5. Application

Product is to be sprayed into wet products (epoxy, polyaspartic, cementitious overlay(s) or solvent-based sealers). Dry applications of this product will not adhere to the surface. Shake can thoroughly prior to use and occasionally during use.

6. Restrictions

Refer to the TDS of the product the Mica Spray is being applied too. Regarding temperature, humidity, condensation, UV exposure and substrate temperature. Use in a well ventilated area, product is flammable, keep away from flame or open source of ignition.
